

# Blueprint Performance Dashboard Reports

## Performance Report by Condition and Measure – with Provider drilldown capability

### Performance Report By Condition and Measure

Condition: HTN

Site: FAHC - Aesculapius Medical Center

#### Instructions:

- Measures are listed in Visit Planner order
- Click on Organization Name for a list of all patients with the condition
- Click on Measure Name in blue for a display of results for each group in the organization and comparative benchmarks
- Click on Measure Denominator for a bar graph of the percent of patients with a measure test/assessment by month and in last 12 months
- Display of measure data is based on last measure result during the time interval. For measures without a specified time interval, averages are based on the

FAHC - Aesculapius Medical Center

Body Mass Index; patients aged 20 and older

Goal: < 25 Calculated

Interval: Per Visit

BMI for Age Percentile; patients aged 2 to 20

Goal: >= 5 Percentile &

<= 84 Percentile

Interval: 365 days

Blood Pressure

Goal: < 130/80 mmHg

Interval: Per Visit

Blood Pressure-SBP

Goal: < 130 mmHg

Interval: Per Visit

Blood Pressure-DBP

Goal: < 80 mmHg

Interval: Per Visit

### Performance Report By Condition and Measure

Condition: HTN

Site: FAHC - Aesculapius Medical Center

Report Run Date: 10/8/2010 11:17:51 AM

Report Current As Of: 10/4/2010 12:56:10 AM

#### Instructions:

- Measures are listed in Visit Planner order
- Click on Organization Name for a list of all patients with the condition
- Click on Measure Name for a bar graph of results for each group in the organization and comparative benchmarks on a rolling 12 month timeline
- Click on Measure Denominator for a bar graph of the percent of patients with a measure test/assessment by month and in last 12 months
- Display of measure data is based on last measure result during the time interval. For measures without a specified time interval, averages are based on the last measure result at any point in time.

Provider Name	Measure	Measure Denominator	% of Patients at Goal	Parent Org % of Patients at Goal	State % Patients at Goal	Measure Average	Parent Measure Average	State Measure Average
XXXXXX, XXXXXX	Body Mass Index Goal: < 25 Calculated Interval: Per Visit	7	0.00%	17.94%	12.47%	29.10	36.51	34.23
	BP Goal: < 130/80 mmHg Interval: Per Visit	7	0.00%	29.33%	31.27%	-	-	-
	BMI-for-Age Percentile Goal: >= 5 Percentile & <= 84 Percentile Interval: 365 days	0	0.00%	0.00%	0.00%	-	-	-
	BP SBP Goal: < 130 mmHg Interval: Per Visit	7	14.29%	42.50%	43.07%	135.20	128.95	130.30
	BP DBP Goal: < 80 mmHg Interval: Per Visit	7	28.57%	46.25%	51.67%	83.60	75.85	75.78

## Patient Drilldown from Performance Dashboard Report by Condition ('List of Patients by <Condition>')

### Performance Review

Vermont

**Condition: CAD**

**Instructions:**

- Measures are listed in Visit Planner order
- Click on Measure Name in blue for a display of results for each group in the organization and comparative benchmarks
- Display of measure data is based on last measure result during the time interval. For measures without a specified time interval, averages are based on the last measure result at any point in time.
- Each measure denominator is based on the age and gender criteria for the measure; therefore, the denominator for a given measure may be less than the population of patients with the condition. In addition, when a patient's last measure result represents a measure exclusion (e.g., patient has bilateral foot amputation and the Annual Comprehensive Foot Exam answer is "NA," the patient will not be included in the denominator.
- The denominator used to calculate the % of patients at goal is the population of patients eligible for a given measure whether or not a measure answer has been recorded for that patient.

Measure	Measure Denominator	Apex % Patients at Goal	Apex Measure Average
Foot Mas...	7	14.29%	28.57%
